

2016 Autumn Rabies Clinics

All dogs, cats and ferrets four (4) months or older must be vaccinated against rabies. (GS 130A-185) The North Carolina Courts have ruled that to be in compliance with this law the Rabies Vaccination must be administered by a licensed veterinarian. It is suggested that cats and ferrets be left inside your vehicle during this clinic and let the veterinarian administer the vaccine there. The cost is \$9.00 per vaccination. Please bring your animals needing vaccination to one of the following locations. (Some veterinarians also offer \$9.00 vaccination in their office during clinic days.) ***Animals that are currently vaccinated and are due for a booster vaccination must be accompanied with the rabies vaccination certificate for verification.***
